

### What's the opportunity and impact?

Develop a book and claim system that appropriately verifies, and values decarbonized products

Buyers can **confidently invest in decarbonized products** and services to meet their climate targets

Buyers can confidently **plan** to meet their climate targets

Suppliers can create a secondary value stream to secure advance offtake agreements for their products

Suppliers can **create secure project financing** and build
more capacity

We speed up deployment and decarbonization through voluntary interventions

# Credible market infrastructure is critical to build trust and enable indirect procurement at scale

# SABA is providing the tools and support that buyers need to invest in SAF at scale

SUSTAINABILITY FRAMEWORK

Supports buyers' investments in high integrity SAF and prevents unintended environmental consequences.

SABA published V1 of the SAF Sustainability Framework in December 2022, V2 in September 2023.

SAF CERTIFICATE REGISTRY

Allows buyers to make transparent emissions reduction claims related to their SAF investment.

The SAFc Registry will go live for public use in Q4 2023.

ACCOUNTING GUIDANCE

Provides guidance on how to measure and report aviation emissions involving SAF.

SABA collaborated with WEF CST to publish guidance in October 2022. This guidance will be regularly updated.

COLLECTIVE PROCUREMENT

Competitive, collective procurement to standardize and simplify the procurement process for companies.

SABA successfully completed its first collective procurement process in early 2023 and is now running a multi-year procurement process.

## SAF certificates (SAFc) build from existing certification systems to provide a key investment tool for customers

### Welcome to the SAFc Registry

Bringing consistency and transparency to the SAFc market.

A COLLABORATION BETWEEN

# The registry is designed to enhance user trust by ensuring:

- Consistency, by implementing standardized processes for registering, transferring and retiring certificates
- Sustainability, by providing certified data on sustainability attributes of each batch of fuel and/or transport solution, e.g. emissions abatement, certifications, etc.
- No double counting, or that valid claims are only made once for every intervention (i.e. ton of SAF), including managing double counting between voluntary and compliance use.
- Transparency, by providing a transparent ledger to support climate disclosure of claims by transport providers, customers, and logistics service providers
- Independent nonprofit ownership and multilateral governance, to ensure that changes are proactively made to the system with user buy-in and in tandem with best practices.

### SAFc registry links procurement and disclosure

		Outside of I	registry	Inside registry			Outside of registry
		Purchase contracts signed	Certified fuel produced	Issuance	Transfer	Retirement	Climate disclosure
	Fuel providers						
X	Air transport providers						
	Logistics service providers						
	Customers of air transport services						
RMI – Ener	rgy. Transformed.						

### **Certificates in a nutshell**

#### Type of certificates

#### **Key attributes of the certificates**

#### **SAFcA**

for air transport providers (scope 1)

#### **SAFcE**

for consumers of aviation services and logistics service providers (scope 3)

#### **Sustainability tier**

#### **SCS-eligible**

Certified to any ISCC or RSB standard across supply chain

#### **SABA-eligible**

Meets threshold SABA (similar to SBTi) criteria

#### **SABA-preferred**

Meets SABA preferred criteria (more on ILUC, displacement)

#### **Usability tier**

#### Voluntary

Not used towards a compliance obligation

#### Compliance

Used towards an emissions reduction obligation by a fuel provider and/or airline for a blending mandate or other ineligible scheme (e.g., CORSIA) - SAFcA only

#### **Assurance level**

#### **Validated**

Certification is valid [default]

#### Revalidated

After a year, certification is still valid (automatic check)

#### **Verified**

Certification body confirms that information is up to date and correct

### SAFc registry gives users flexibility while checking usability

## MARITIME BOOK AND CLAIM

## MMMCZCS and RMI are developing a maritime B&C that allows companies in the value chain to accelerate their decarbonization

Led by not-for-profits with extensive experience in both the maritime industry and Book & Claim

Piloting a platform and a methodology that focuses on credibility and transparency

#### **Activities**

- **Design**: Project focusing on how a maritime specific Book & Claim should be designed. Culminated in the release of two reports in April 2023.
- **Scoping**: Scoping work for pilot phase and outreach towards potential participants and advisors
- **Prep for Pilot**: Translating report into concrete work packages to be tested in the pilot
- Pilot: Test of platform and methodology based on real voyages from participants

## MBC provides the rules and the platform to facilitate decarbonization efforts of organizations through value chain

		Mar				
	Commercial agreements	Booking	Passing	Swapping	Claiming	Climate disclosure
Shipowners / operators						
Freight forwarders						
Cargo owners						

#### Assurance relies on robust verification schemes through value chain

PoS = Proof of Sustainability
PoC = Proof of Compliance

CoC = Chain of Custody

BDN = Bunker Delivery Note BOL = Bill of Lading

BSR = Bunker Survey Report

TBD =To be defined (check April's report for initial proposal)

# **Book & Claim Community for Heavy Transport**

Smart Freight Centre (SFC) and RMI are partnering as secretariat to connect, support, and catalyze efforts across numerous stakeholders towards the development of a unified book and claim chain of custody framework for transport decarbonization.

#### **Program objectives**

- Serve as a central hub. Bring together actors developing book and claim systems and offerings to help enable book and claim to function at scale.
- **Reduce duplication**. Facilitate work across book and claim stakeholders to avoid overlap and to identify and resolve barriers and gaps.
- Communicate and advocate. Create a clear narrative about how book and claim can help accelerate heavy transport decarbonization and how book and claim stakeholders are working together to realize this goal.
